

SPECIFICATION AMENDMENTS

Please amend the Specification as follows:

Page 15, 3rd Paragraph:

Herein, "amorphous polyester" is defined that polyester ~~molecules~~ resins, a clear crystal structure which is not recognized by means of X-ray diffraction, occupy at least 50 ~~mol~~ wt. % of the total component ~~molecules~~ resins. More specifically, polyester ~~molecules~~ resins, which have a crystallization degree of less than 0.1% occupy not less than 50% of the total component ~~molecules~~ resins, are known as amorphous polyester.
